BizNet Introduces Excel®-based Business Information Product Suite

Platform provides real-time business data and automated report distribution with Microsoft® Office Excel®.

DALLAS (May 6, 2010) — [BizNet™ Software](#), the experts in real-time, Microsoft Excel®-based business reporting and analytics solutions, announces the immediate availability of its [BizNet™ Excel® Business Information Product Suite](#), consisting of three complementary BizNet products: [BizInsight™](#), [BizContent™](#) and [BizBroadcast™](#).

According to BizNet founder and president, George McMann, the BizNet Excel® business information suite offers businesses a one-stop reporting and business intelligence solution for the day-to-day challenges they face in compiling Excel® reports and accessing, analyzing and distributing data throughout the organization. "Information is of marginal value if it cannot be quickly, easily and fully utilized and assimilated so deeply into a business' decision-making that it becomes an organic part of their operations. We believe the BizNet™ Excel® Business Information Product Suite provides the tools business needs to fully exploit the value of their business information."

[BizInsight™](#) is the reporting and business intelligence component of the product suite. It provides Excel® users the ability to do drag-and-drop real time reporting and multi-dimensional analysis. With BizInsight™, managers in every department can quickly analyze, process and share secure and accurate data critical to making the right decisions and enhancing business performance.

[BizContent™](#) provides organizations with pre-built best practice reporting and analysis with out-of-the-box database connectivity for real time access to business data within Excel®. BizContent™ jump starts an organization's ability to provide complete up to date insight into business performance. It saves companies time, money, and starts delivering results immediately.

[BizBroadcast™](#) enables organizations to automate the creation and distribution of Excel® reports in a variety of formats and methods, ensuring that each user receives only timely information critical to his or her individual responsibilities - delivered via a familiar Excel® format.

The BizNet™ Excel® Business Information Product Suite requires no additional hardware and can be fully deployed in less than a day.

ABOUT BIZNET SOFTWARE:

BizNet Software®, Inc. (BizNet) builds pre-integrated Excel-based business reporting and analytics products for the mid-market. Founded in 1996 to take the mystery out of databases, BizNet focuses on data integration guided by financial and accounting professionals with a real-world understanding of corporate financial, operational and technical requirements to extract and present data with efficient, powerful and easy-to-use tools that leverage existing financial and desktop systems. Its flagship product BizInsight creates a real-time link to business data for dynamic access to the most accurate and current data in Excel-based spreadsheet reports. Built upon fundamental accounting disciplines and controls, BizNet solutions create a self-sufficient work environment for professionals that streamlines workflow and improves productivity. BizNet Software is a privately held company based in Dallas, TX. More information about the company is available at <http://www.biznetsoftware.com>.
