BizNet Software Announces Strategic Alliance with Epicor to Provide Innovative Excel® Based Solution to Midmarket

Epicor Leverages BizNet Software's Excel® Based Reporting and Analytics Foundation with Release of Epicor XL Connect

DALLAS, TX (January 4, 2010) — BizNet Software, Inc., a leading provider of Microsoft Excel® based business solutions, announced today a strategic alliance with Epicor® Software Corporation (NASDAQ: EPIC), a leading provider of enterprise business software solutions for the midmarket and divisions of Global 1000 companies. Epicor announced earlier this week the release of Epicor XL Connect, Powered by BizNet Software technology.

Epicor XL Connect provides intuitive and powerful reporting and analysis capabilities to business users, using Microsoft Excel as the end user experience for report development and sharing. The solution takes the familiarity that business users have with Excel and extends it by giving them direct and secured access – using meaningful business terms – to the financial data they need to meet all of their reporting requirements. The application's ability to link to real-time financial data from Epicor's solutions gives users the assurance that they are working with data that is up-to-date and accurate. Additionally, because Epicor XL Connect is powered by BizNet technology – the same employed in BizInsight – users can take advantage of dynamic, multi-dimensional drilldown based on what the user is exploring, providing a level of business insight not available with any other reporting tool.

“Epicor is a key strategic partner of BizNet,” stated George McCann, CEO and president of BizNet Software. “We are extremely excited about expanding our relationship with the company by providing our application platform, which is being used to deliver a tailored solution directly to Epicor's customers,” stated George McMann, CEO and president of BizNet Software. “Both companies strongly believe that equipping customers with the right tools for reporting and analysis are key to driving business success.”

- MORE -

“The majority of our customers use Excel every day,” said Scott Hays, director of product marketing at Epicor. “Their businesses depend on Excel, and also on the Epicor Enterprise system and the data in it.” According to Hays, Epicor XL Connect extends the BizNet platform by incorporating built-in Excel functions expressly designed for Epicor Enterprise data. “For Epicor’s customers, this makes gathering and arranging Enterprise information in Excel simple and fast and ideal for day-in/day-out usability by accounting staff, line-level managers, and any executive that can enter a formula in Excel.”

Epicor XL Connect is now available for Epicor Enterprise customers. For more information on Epicor XL Connect, e-mail info@epicor.com.

Epicor is a global leader delivering business software solutions to the manufacturing, distribution, retail, hospitality and services industries. With 20,000 customers in over 150 countries, Epicor provides integrated enterprise resource planning (ERP), customer relationship management (CRM), supply chain management (SCM) and enterprise retail software solutions that enable companies to drive increased efficiency and improve profitability. About BizNet Software:

BizNet Software®, Inc. (BizNet) builds pre-integrated Excel-based business reporting and analytics products for the mid-market. Founded in 1996 to take the mystery out of databases, BizNet focuses on data integration guided by financial and business professionals with a real-world understanding of corporate financial, operational and technical requirements to extract and present data with efficient, powerful and easy-to-use tools that leverage existing financial and desktop systems. Its flagship product, BizInsight, creates a real-time link to business data for dynamic access to the most accurate and current data in Excel-based spreadsheet reports. BizNet Software is a privately held company based in Dallas, TX. More information about the company is available at <http://www.biznetsoftware.com>.

BizInsight is a trademark of BizNet Software, Inc.
