

BizNet Insight™ for EAS

Simple. Powerful. Accurate.

BizNet Insight for SunGard iWORKS EAS integrates your EAS General Ledger with Microsoft Office to enable financial decision makers to easily create, view, analyze and refresh G/L data without having to leave the Microsoft Excel environment.

>> Excel-based Interactive Reporting

BizNet Insight for EAS is a Microsoft® Office-based solution that delivers simple, yet powerful, financial reporting and document management capabilities to improve the ROI of your EAS investment.

>> Direct Link to your General Ledger Data

The BizExcelerator™ is an Excel-based reporting and analytics product developed by BizNet Software®, Inc. as part of the BizNet Insight solution. The BizExcelerator creates a direct link from your EAS G/L to Excel, removing the need for a data warehouse, providing accountants with the assurance that data in Excel *always* ties to the G/L.

	2004	2003
ASSETS		
CASH AND INVESTED ASSETS	\$30,206,861.53	\$29,826,542.64

Underwriting Exp	0.59	4.30
Total Net Income	0.26	2.27

Powerful dashboards can be created directly in Excel, and refreshed with a click of the mouse.

>> Powerful Reporting Capabilities

With the BizExcelerator, you have complete access to your General Ledger data. End users can simply enter a fiscal year, period, reporting company, accounting basis, or business unit type and the latest data from your G/L will automatically populate within Excel. As soon as an entry is posted within the G/L, you can refresh your Excel spreadsheet and see it. Reporting on your General Ledger data is simple, powerful, and accurate.

Improve access to and control over existing Crystal Reports and Excel spreadsheets with one, web-based location.

>> Enhance Security and Management over Reports

BizNet Insight for EAS provides a pre-built web-based template, built upon Microsoft SharePoint® Services, that enables end users to control security over, and access to, reports. In addition, the collaboration and document management features inherent within SharePoint Services provide powerful new capabilities around accessing critical business data and improving decision-making.

- Automated e-mail alerts notify users when documents have changed to ensure workers have the most current information
- Teams and individuals are empowered to share information and collaborate on projects
- Document check-in and check-out locks files down for editing – ensuring one version of the truth
- Version tracking enables users to view changes and maintain accuracy around Excel spreadsheets, documents, files, and reports
- Role-based security controls who can access and modify content
- Content approval improves workflow on time sensitive documents

The BizNet Insight Report Viewer enables users to view Crystal Reports without needing Crystal on their PC.

>> Improve Access to Existing Crystal Reports

BizNet Insight for EAS also includes a report viewer that enables end users to view Crystal Reports® from their own desktop. The BizNet Insight Report Viewer preserves the powerful features inherent within Crystal, as end users can view reporting hierarchies, drill-down to detail, and export reports to PDF for distribution.
