BizNet Introduces BizExcelerator Excel®-Based Financial Reporting for Epicor Enterprise Customers

Pre-integrated Excel-based accounting tool enables powerful, real-time reporting and analysis, user-friendly setup and dynamic report design

DALLAS (Feb. 25, 2008) — BizNet Software, the experts in real-time, Excel®-based financial reporting and analysis solutions, has released the next generation of financial reporting software for large, mid-market enterprise customers with the revolutionary BizExcelerator for users of Epicor Enterprise.

The [BizExcelerator](#) financial reporting and analytics product provides simple yet powerful financial reporting and analysis capabilities to accountants for immediate control of the entire financial reporting and analysis process by ensuring data from the general ledger (G/L) ties to data in Microsoft Excel spreadsheets.

“No other provider can offer Epicor Enterprise users comprehensive, real-time Excel-based financial reporting and multi-dimensional analytics,” says George McMann, founder, president and CEO of BizNet Software. “We continue to see and hear that most of the industry’s incumbent reporting tools are difficult to learn and use – with only one or two people who can create the reports – and the reports available do not give them enough flexibility. BizExcelerator removes all of those obstacles – for less than half of what CFOs have paid for less advanced solutions.”

Securing and enhancing data sourcing and collection for Excel spreadsheet technology, BizNet’s groundbreaking BizExcelerator solution eliminates all barriers to financial reporting for mid-market companies by allowing end users to operate in Excel – the standard language of business – while accessing the latest corporate financial data via direct integration with Epicor Enterprise. BizExcelerator also provides powerful, multi-dimensional analytical capabilities without needing sophisticated business intelligence tools.

BizExcelerator from BizNet offers a cost-effective, efficient and powerful alternative to standard reporting solutions, resulting in high user acceptance and adoption, faster and more efficient reporting cycles, and increased business intelligence throughout the organization.

BizNet Introduces BizExcelerator Financial Reporting & Analysis for Epicor Financials

Page 2 of 2

BizExcelerator offers full-featured functionality and usability at a fraction of the cost of traditional financial reporting packages:

- Full integration with Excel
- Pre-integrated with Epicor Enterprise (no implementation cost)
- Convert existing spreadsheets into live reports
- Little or no training required
- Simple and fast installation in minutes
- Custom report-building for any user
- Drill to account detail, journal entries and accounts payable (all within Excel)
- Multiple Company Consolidation
- Reporting against budget and actual numbers
- Utilizes account groups created in Epicor Enterprise
- Multi-dimensional analytics
- Report creation using account wildcarding, account ranges and account list
- Immediate journal entry posting and reflection

Available immediately through BizNet, the BizExcelerator for Epicor Enterprise base package starts at \$6,500. No additional hardware is required.

BizNet offers both an online demonstration and a free 30-day evaluation copy of BizExcelerator to prospective customers to try with their own data and report designs. Requests for evaluation copies can be made at www.biznetsoftware.com.

ABOUT BIZNET SOFTWARE:

BizNet Software®, Inc. (BizNet) builds pre-integrated Excel-based financial reporting products for the mid-market. Founded in 1996 to take the mystery out of databases, BizNet focuses on data integration guided by financial and accounting professionals with a real-world understanding of corporate financial, operational and technical requirements to extract and present data with efficient, powerful and easy-to-use tools that leverage existing financial and desktop systems. Its flagship product BizExcelerator creates a direct, real-time link to databases for live access to the most accurate and current data in Excel-based spreadsheet reports. Built upon fundamental accounting disciplines and controls, BizNet solutions create a self-sufficient work environment for accounting professionals that streamlines workflow and improves productivity. BizNet Software, a privately held company based in Dallas, maintains strategic support for the Institute for Excellence in Corporate Governance at The University of Texas at Dallas, School of Management. More information about the company is available at <http://www.biznetsoftware.com>.
